

CONNECTION BETWEEN ETHERNET CONVERTER TIBBO DS100R, OR DS100B, OR DS202 AND Contatto DEVICES

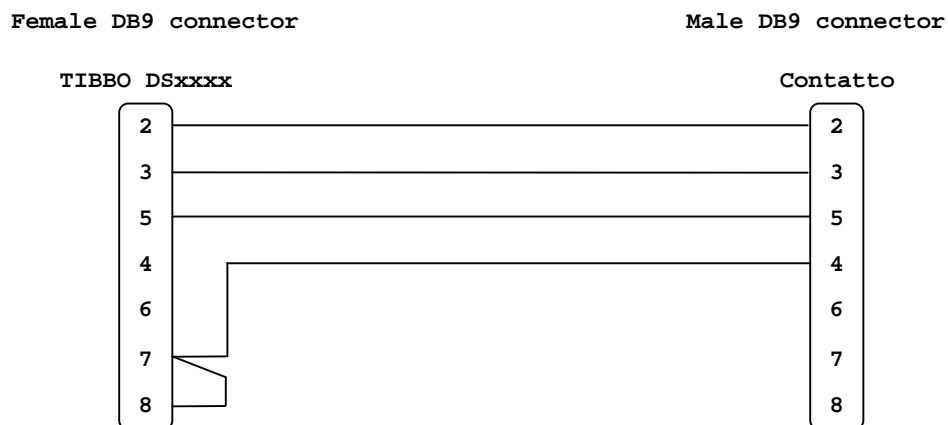

Introduction

This application note describes the cables to be used for the proper connection between the Ethernet converter TIBBO mod. DS100R or DS100B or DS202 and the following devices of **Contatto** family:

- MCP/MOD
- MCP Plus
- ISD
- MODGSM

The type of connection is RS232 (only DS100B converter also features RS485 and RS422 communication).

Cable wiring

Note: pins not shown must be left unconnected.
